downgrading and declassification

PREFACE

This report is one in a series on Soviet Ground Force and logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center IP1c (DIA). The photographic analysis for this particular report was performed by the NPIC Photographic Analysis Group.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training area or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

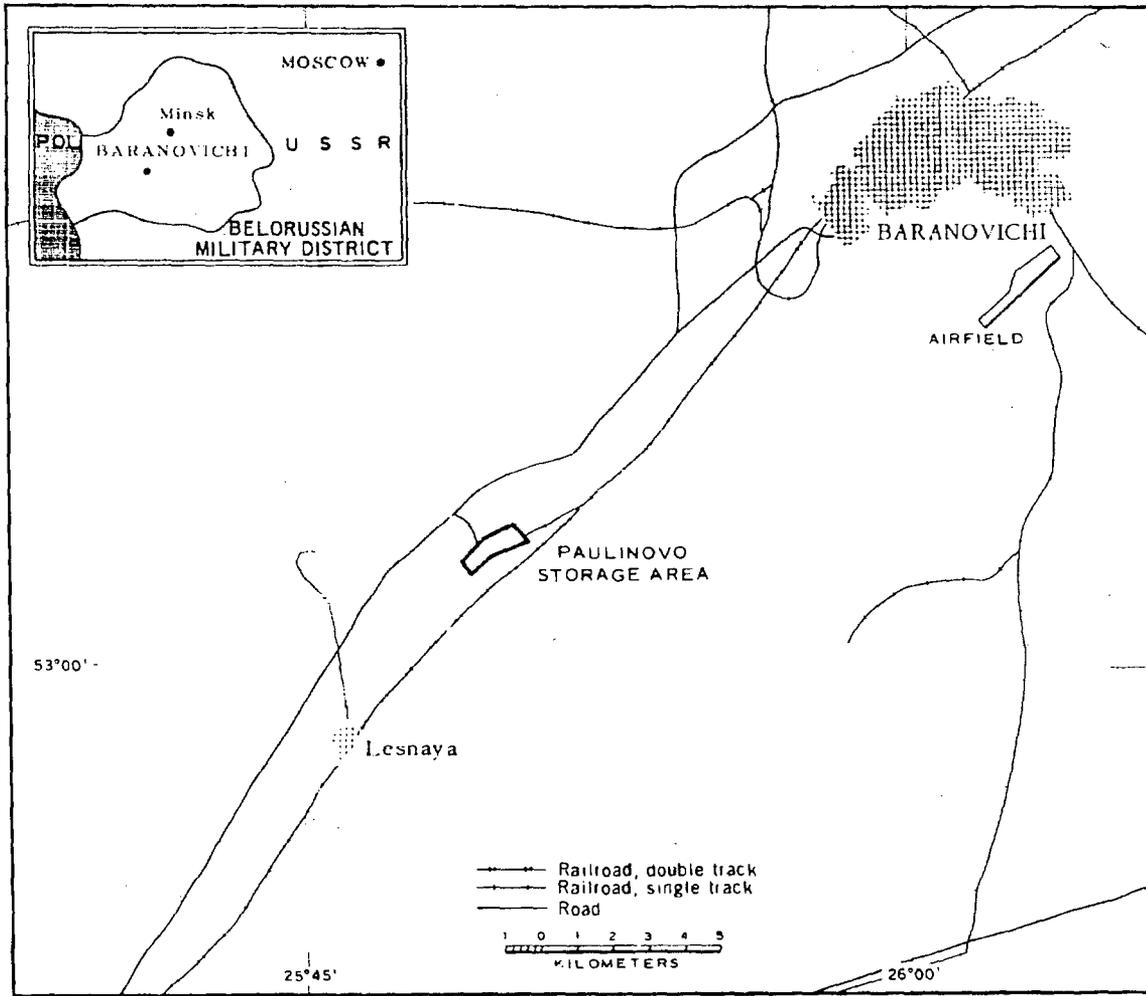

FIGURE 1. LOCATION OF PAULINOVO STORAGE AREA.

SUMMARY

A secured storage area, annotated on the US Air Target Chart as Ammunition Storage Area, Paulinovo is located 15 kilometers (km) southwest of Baranovichi (53-08N 026-01E) on the north side of the Baranovichi-Brest rail line (Figure 1). The installation is served by a spur from the main rail line and has access by two secondary roads to the all-weather road connecting Baranovichi to Slonim and Brest. Baranovichi Army Barracks and Maneuver Area Lesnaya (TA-1) is located approximately 2 km north. Other military installations in the immediate area include the Ammunition Storage Area Lesnaya North, 4 km east, and Baranovichi Army Barracks Southwest (AL-1) and East (AL-2).

The installation comprises a separately secured storage area and a support installation.

The storage area covers approximately 115 acres and contains 12 storage and two support buildings. The support area covers approximately 90 acres and contains one administration building, one barracks, two vehicles sheds and 45 small support buildings.

The area is covered by 1956 TALENT photography and 10 KEYHOLE missions between February 1962 and February 1964. Very little ground scarring is observed. Twenty small support buildings have been added in the support area since 1956.

This installation has been reported as an ammunition storage area; however, comparative analysis of TALENT and KEYHOLE photography reveals it is probably a general storage area. The buildings are closely spaced and unrevetted.

DESCRIPTION OF INSTALLATION

Railroad Service

A spur line from the double-track Baranovichi-Brest rail line serves the east part of the installation.

Road Service

Two secondary roads connect the installation with the all-weather primary road leading from Baranovichi to Brest. The installation is also connected by secondary roads to the Baranovichi Army Barracks and Maneuver Area Lesnaya and the Ammunition Storage Area Lesnaya North.

Administrative and Troop Housing Area

One probable barracks and one administration building are located in area D (Figure 3).

General Storage Area

Twelve general storage buildings are located in the storage area (area E1, Figure 3). Of the 12 in area E1, three small storage buildings have been added since 1956. The area also contains two support buildings. Of the 36 support buildings in area E2, 15 have been erected since 1956. Track activity indicates both areas are occupied.

Other Buildings

Three support buildings are located outside the probable perimeter fence of the support installation.

Equipment Storage/Maintenance Areas

Two 200- by 50-foot vehicle sheds and six support buildings, two new since 1956, are located in area J (Figure 3). Track activity indicates these buildings are occupied.
